-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1618

Claims 1-37 are presented for examination.

The remarks filed on August 17, 2005 have been received and entered.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-24, 27-28 and 35-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Galin (U.S. Patent 6,730,691). Galin teaches the use of the claimed alpha 1 antagonist in combination with an agent, which reduces the irritation to the eye, such as tetrahydrozolone for modulating pupil dilation. See column 2, lines 25-35, column 3, lines 60-67, column 4, lines 65-67, column 5, lines 1-4 and claims 4 and 8.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 25, 26-29, 30-33 and 36-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Galin (U.S. Patent 6,730,691). Galin teaches the use of the claim

designated alpha-adrenergic antagonists in combination with the claimed anti-irritant for modulating the pupil diameter. See column 2, lines 25-35, column 3, lines 60-67, column 4, lines 65-67, column 5, lines 1-4 and claims 4 and 8. The above reference differs from the claimed invention in the diameter of pupil dilation or the carriers used. It would have been obvious to a person skilled in the art to determine the pupil diameter or the pharmaceutical acceptable carriers in the absence of evidence to the contrary. One skilled in the art would have been motivated to employ the teachings of the above reference, since it relates to a combination of an alpha- adrenergic antagonist and an anti-irritant agent for modulating the pupil dilation. The determination of pupil diameter and suitable carriers is considered to be within the skill of the artisan in the absence of evidence to the contrary.

The newly submitted reference necessitates the new ground of rejection.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
